

Overdose/Toxic Ingestion

Consider:

- Naloxone
- Blood glucose level
- Supplemental oxygen
- Body temperature
- 12-lead EKG

Suspected overdose/toxic ingestion may require the use of various protocols. Exit to relevant protocols as necessary.

**Poison Control Center:
1-800-222-1222**

IV/IO Access

Suspected drug/toxin

Tricyclic Antidepressant

Consider Sodium Bicarbonate

Beta Blocker

Consider Glucagon

Calcium Channel Blocker

Consider Calcium Chloride

Organophosphate

Consider Nerve agent antidote kit (if available)

Consider Atropine

Carbon Monoxide

Consider cyanide poisoning kit (provided by Artazn)

ADULT:

Atropine
2 mg
Calcium Chloride
500 mg, Over 2 min
Glucagon
1-2 mg
Naloxone
0.4-2 mg
Sodium Bicarbonate
50 mEq

PEDIATRIC:

Atropine
0.02 mg/kg
Calcium Chloride
10 mg/kg, Over 3 min
Glucagon
0.5-1 mg
Naloxone
0.1 mg
Sodium Bicarbonate
1 mEq/kg
